THE WELDING JOURNAL

Index to Volume 19—1940

Published by the American Welding Society, 33 West 39th Street, New York, N. Y.

Part I—The Welding Journal

This part includes general technical articles, papers presented before Section and National meetings, news, biographical items, current welding literature, and advertising.

Page Allocation by Issues

January.....	1–88	July.....	465–544
February.....	89–168	August.....	545–616
March.....	169–248	September....	617–700
April.....	249–320	October.....	701–804
May.....	321–392	November....	805–900
June.....	393–464	December....	901–1012

Part II—Welding Research Supplement

This section includes the reports of the Welding Research Committee, critical digests of the literature, reports of the Fundamental Research Division and of the Industrial Research Division.

Page Allocation by Issues

January...	1-s-40-s	July.....	241-s-280-s
February..	41-s-80-s	August....	281-s-312-s
March....	81-s-120-s	September.	313-s-344-s
April.....	121-s-160-s	October...	345-s-440-s
May.....	161-s-208-s	November.	441-s-472-s
June.....	209-s-240-s	December.	473-s-492-s

PART I—THE WELDING JOURNAL

SUBJECT INDEX

Aircraft Construction, Spot Welding in—C. F. Marschner, 750–753.
Aircraft Industry, Welding in—L. P. Wood, 476–481.
American Welding Society—Year Book, 901–1012
Arc Welding—Twenty-five Years' Progress—L. J. Larson, 360.
Atomic Hydrogen Arc Welding—W. E. Wilson, 25–29.
Automatic Gas Welding of Refrigerators—R. G. Rodgers and W. R. Campbell, 403–407.
Automatic Oxyacetylene Welding—H. T. Herbst, 841–845.
Automotive—Arc Welded Axle Housings—J. W. Meadowcroft, 357–359.
Automotive—Corrugated Trailer Body—G. W. Telford, 402.

Barge, Coal—508.
Barge Welding, Modernization of Shop for—G. F. Wolfe and P. G. Strohl, 127–134.
Brazing and Welding of Light Gage Metals—L. Ayers, 43.
Brazing—Electric Methods—R. J. Wensley, 754–758.
Bridge—Allowable Stresses—Jonathan Jones, 355–356.
Bridge Pier Repair—834–836.
Bronze Welding, Automatic—R. Hawley, 423–424.

Castings and Rolled Steel Plate in Welded Fabrication—H. J. Shiffli and E. L. Krecji, 173–177.
Cast Iron Pulleys Welded—F. F. Mooney, 269.
Chromium Steel Castings Cut—R. B. Aitchison, 325–328.
Cost and Procedure Control by Use of Polarized Light—E. W. P. Smith, 733–737.
Crane, Floating—J. F. Smith, 184–185.
Cranes Welded—D. T. Streithof, 280–281.
Crusher Repair—J. L. Bearden, 436–437.
Cutting Chromium Steel Castings—R. B. Aitchison, 325–328.
Cutting Clad Steel—H. F. Lassner, 500–501.
Cutting in Shipbuilding and Repair—R. E. King, 621–624.
Cutting, Machine Flame—H. C. Boardman, 487–499.
Cutting Sprockets—A. B. Jones, 93–94.
Cutting Standards, German—854.

Definitions of Welding Terms—Committee Report—270–279.
Die Casting Repairs—H. H. Moss, 178–181.

Electrode Specifications—Committee Report—512–515.
Enameling, Welding for—J. C. Lewis, 509–511.

Flame Hardening—R. H. Zeilman, 746–749.
Flame Hardening—Commercial Work—W. G. Hamilton, 253–255.
Flame Hardening of Machine Parts—John Erler and P. H. Tomlinson, 705–709.
Flame Hardening of Machine Tools—F. C. Dull, 39–41.
Flame Treating—J. H. Zimmerman, 104–110.

Galvanized Iron Welding—J. F. Galbraith, 338–340.
Galvanized Sheets—New Method of Welding—A. R. Eckberg, 293–294.
Gas Cutting—Preparation for Welding—H. E. Rockefeller, 5–11.
Generators, Welding, Characteristics of—Paul G. See, 340–342.
Gouging—A Flame-Machining Process—R. F. Flood, 482–486.

Hard Facing by Fusion Welding—T. B. Jefferson, 51–53.
Health Aspects of Gas Welding—Dr. A. G. Cranch, 633–636.

Instrumentation of Arc Welding—R. E. Kinkead, 651–653.

Jigs and Fixtures for Oxyacetylene Welding—J. Haydock, 549–552.

Ladles, Welded—636–637.
Lock Gates—Design and Construction—H. E. Brainard and E. J. Ramer, 588–592.
Locomotive, Diesel-Electric, Automatic Welding in—J. H. Hruska, 114–118.

Machinery Construction—Design and Welded—H. C. Hettelsater, 257–262.
Machinery—Electrical Equipment—R. A. Taylor, 762–765.
Machinery, Farm—L. M. Benkert, 661–663.
Machinery, Large Welded—L. S. McPhee, 266–268.
Machinery, Rolling Mill—G. W. Linkhauer, 765–766.
Maintenance of Bakery Equipment—A. F. Davis, 836–838.
Metallurgy, Welding—O. H. Henry and G. E. Claussen, 55–56, 134–138, 181–184, 285–287, 342–349, 413–422, 501–508, 571–575, 624–633.
Metal Spray Protection of Refinery Equipment—D. R. Johnson and E. K. Dewey, 397–401.

Nozzles and Their Reinforcement—F. C. Fantz and W. G. Hooper, 119–125; Discussion by A. McCutchan, 125–126.

Oxyacetylene Industry—Twenty-five Years' Progress—J. J. Crowe, 361.

Physical Properties of Weld Metal—W. D. Walcott, 21–24.
Pipe—Aligning Clamp—T. F. Leach, 256.
Pipe and Pipe Fitting Applications—E. Hall Taylor, 142–145.
Pipe—Fatigue Tests—E. Siebel and K. Wellinger, 593.
Piping—Carbon-Molybdenum Steel for High-Pressure, High-Temperature Service—R. M. Rooke and F. C. Saacke, Part I, 553–562; Part II—A. N. Kugler, 562–567; Discussion by E. R. Seabloom, 639–641.
Piping—Investigations of Gas and Arc Welds—I. H. Carlson and E. R. Seabloom, 846–854.
Plate Edge Preparation for Welding—H. E. Rockefeller, 5–11.
Plug and Slot Welds Shear Tests—C. E. Loos and F. H. Dill, 98–103.

E. Eng. Lib.

Pressure Vessels, Codes for—D. S. Jacobus, 758–761.
Pressure Vessels, Fabrication of Large Diameter—J. F. Bechtle, 36–39.
Production Welding, Flow of Materials in—W. W. Petry, 53–54.
Projection Welding, Applications of—L. H. Frost, 212–214.
Propane, Industrial Uses of—Clary, Sheely and Fyke, 192–194.
Pulleys Constructed by Welding—C. F. Rowley, 401.
Pulsation Welding Broadens Field for Resistance Welding—H. C. Cogan and R. S. Pelton, Part I, 95–96; Part II, 263–266; Part III, 568–571.

Qualifying Welding Operators for Important Work—L. M. Dalcher, 817–819.

Railroad—Streamliners for Europe—567.
Railroad—Tank Car Construction—J. W. Sheffer, 738–742.
Reclaiming Spindles, Crabs, and Coupling Boxes—D. B. Rice, 855–856.
Refrigerators, Automatic Gas Welding of—R. G. Rodgers and W. R. Campbell, 403–407.
Repair of Mechanical Equipment by Welding—H. M. Galloway, 475–476.
Repairing Pulp Beater Drum—H. V. Gilson, 833–834.
Resistance Flash Welding of Strip in Steel Mills—J. H. Cooper, 721–729.
Resistance Projection Welding—L. H. Frost, 212–214.
Resistance Pulsation Welding—H. C. Cogan and R. S. Pelton, Part I, 95–96; Part II, 263–266; Part III, 568–571.
Resistance Spot Welding—J. W. Meadowcroft, 437.
Resistance Spot Welding Equipment—Stored Energy Type—G. S. Mikhalapov and C. N. Weygandt, 820–833.
Resistance Spot Welds—J. W. Meadowcroft, 839–840.
Resistance Welding Applications—C. L. Pfeiffer, 14–19.
Resistance Welding Assemblies—E. W. Forkner, 12–13.
Resistance Welding Contactors—F. H. Roby, 282–284.
Resistance Welding Current Measurement—E. W. Clark, 215–218.
Resistance Welding Fundamentals—S. M. Humphrey, 112–113.
Resistance Welding, Latest Developments in—R. T. Gillette, 186–191.
Resistance Welding Machines, Circuit Breakers for—W. A. Holland, 41–42.
Resistance Welding Power Supply—Committee Report—Part I, 350–355; Part II, 426–436.
Resistance Welding Recorders and Indicators—W. C. Hutchins, 857–861.
Resistance Welding—Twenty-five Years' Progress—362.
Rigid Frame Design—M. P. Korn, 30–35.
Rigid Frame Structures—M. P. Korn, 281.

Shipbuilding on a Production Basis—A. J. Grassick, 642–646.
Shipbuilding, Welding in—E. C. Rechtin, 288–292.
Shipbuilding, Welding in—David Arnott, 809–816.
Ship Welding, High Spots in—E. D. Debes, 110–112.
Shrinkage of Steel—Discussion—C. R. Whittemore, 29–30.
Silver Alloy Brazing—R. H. Leach, 408–413.
Silver and Alloy Soldering—C. F. Zappone, 743–745.
Spectrographic and X-ray Tests of Metals—Willi M. Cohn, 138–141.
Spot Welding Equipment—Stored Energy Type—G. S. Mikhalapov and C. N. Weygandt, 820–833.
Spot Welding in Aircraft Construction—C. F. Marschner, 750–753.
Spot Welding Light Sections—856.
Stokers, Production Cutting of—S. P. McCracken, 424–425.
Structural—Arc Welded Plant—J. R. Morrill, 646–647.
Structural—Butt-Welded Beam and Girder Splices—LaMotte Grover, 654–658.
Structural—Design and Construction of Industrial Plants—A. S. Low, 329–338.
Structural—Rigid Frame, Design of—M. P. Korn, 30–35.
Structural—Steel Underbridge at Hainault—H. W. Clark, 469–475.
Structures—Design and Construction of—LaMotte Grover, 710–716.
Structures—Welded Rigid Frame—A. Amirikian, 717–720.
Structures Welded Under the Bureau of Yards and Docks, Navy Dept.—Commdr. C. A. Trexel, 45–50.

Tanks, Field Welded Storage, Specifications for—Committee Report—576–584.
Testing of Welds, Specifications for—Committee Report—201–211.
Thermit and Arc Welding Combined in Fabricating Mill Housing—M. L. Smith, 97.
Thermit Welds Saves Cylinder—M. L. Smith, 552.
Tool Repair—F. T. Van Syckel, 659.
Trailer of 50-Ton Capacity—A. F. Davis, 660.
Training Aims at Basic Skill—S. J. Slater, 631–638.
Training Course for Mechanical Engineering Students—G. B. Carson, 584–587.
Training of Welding Operators—S. L. Land, 730–732.
Training Welders—S. H. Moir, 287–288.
Training Welding Operators for Industry—A. P. Haller, 648–650.
Tubing—Welded Propeller Shaft for Automotive Industry—G. C. Gridley, 195–200.

Unionmelt Welding Process—499–500.

Vertical Welding—W. H. T. Svanoe, 11–12.

White Metal Grilles, How to Repair—H. H. Moss, 178–181.
Wire Mesh Joining—C. C. Notebaert, 20–21.

X-Ray Tests of Metals—Willi M. Cohn, 138–141.

AUTHOR INDEX

WELDING RESEARCH COMMITTEE

PART II—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Aluminum, Strength of welds—G. O. Hoglund, 12–13.
Combined stresses—J. Marin and R. I. Stanley, 74–80.
Brazing—G. O. Hoglund, 123–125.
Spot welding—C. Haase, 307–310.
Arc Welding, Manganese in coated electrodes—R. D. Thomas, Jr., 73.
Grain size of covered electrode welds—H. Granberry, 98–99.
Reactions in arc welding—R. W. Emerson, 108–109.
Controlled atmospheres—G. E. Doan and M. C. Smith, 110–116.
Alloying in arc welding—Discussion, 127–130.
Pilot tests of covered electrodes—H. J. Godfrey and E. H. Mount, 133–136.
Physical chemistry—D. E. Babcock and S. A. Braley, 222–230, 465–472.
Hydrogen in weld metal—C. A. Zapffe and C. E. Sims, 377–395.
Armour Institute, Building, 23

Brazing, aluminum, G. O. Hoglund, 123–125.

Cast iron, Recovery of silicon—P. R. Hall and R. M. Allen, 130–132.
Covered electrodes—F. W. Scott, 217–221.
Cast-iron electrodes—G. S. Schaller, 395–401.
Copper, Welding—A. P. Young, 1–8.
Creep, Arc welded mild steel—N. F. Ward, 14–20.

Fatigue, Unionmelt welds—L. B. Durant and J. F. Ennis, 61–65.
Fillet welds in torsion—A. Thum and A. Erker, 71–73.
Structural welds—W. M. Wilson and A. B. Wilder, 100–108.
Effect of rest—K. Daeves, E. Gerold and E. H. Schulz, 145.
Welded rail—H. F. Moore, H. R. Thomas and R. E. Cramer, 293–302.
Car joints—A. Erker and T. Cleff, 311–312.
German welding meeting, 310.

Hard facing, Arc deposits, H. B. Crockett and M. L. Begeman, 31–36.
Hydrogen in weld metal—C. A. Zapffe and C. E. Sims, 377–395.

Mauretania steel, Welded—B. P. Haigh, 50.

Oil well casing, Welding—L. R. Hodell, 41–50.
Oxyacetylene welding, Cast iron—P. R. Hall and R. M. Allen, 130–132.
Peening—G. Czternasty, 160.
Alloy steel filler rods—A. Theis and K. L. Zeyen, 332–333.
Oxygen cutting, Metallurgy—J. R. Cady, 335–344.

Peening, oxyacetylene welds—G. Czternasty, 160.
Pressure vessel welding, Trepanning—W. T. Tiffin, 37–40.
Radiographed pipe welds—M. Roš and E. Brandenberger, 97–98.
Reinforcement of openings—E. Siebel and S. Schwaigener, 238–240.
Carbon-molybdenum piping—R. W. Emerson, 366–376.

Rail, Welded, for mines—G. P. Boomsliter and C. H. Cather, 137–140.
Joint investigation—H. F. Moore, H. R. Thomas and R. E. Cramer, 293–302.
Rensselaer Polytechnic Institute—Welding course, 23.
Resistance welding, Condenser-type welders—M. Mathieu, 65.
Modulators for seam welding—E. Rietsch, 125–127.
Fracture of spot welds—D. E. Babcock, 141–145.
Light metals—C. Haase, 307–310.
Tests for spot welds, 333–334.
Tip shape—W. F. Hess and R. A. Wyant, 345–350.
Kinetics of flash welding, 401.
Contact resistance—W. B. Kouwenhoven and J. Tampico, 408–413.
Fundamentals—R. S. Pelton, 426–432.
Friction and inertia in spot welders—W. F. Hess and R. A. Wyant, 433–440.

Safety congress, 20.
Shipbuilding, Faying flange in welded construction—W. A. Ramshaw and R. D. Bradway, 21–23.
Stainless steel, discussion, 127–130.
Stresses, Combined, yield of aluminum—J. Marin and R. L. Stanley, 74–80.
Thermal, graphical analysis—D. White, 231–238.
Residual—C. T. Gayley and J. G. Willis, 303–306.
Shrinkage—D. Rosenthal and J. Zábrś, 323–331.
Structural welding, Strength of welded rigid frame—A. H. Stang and M. Greenspan, 9–12.
Beam-column connections—J. D. Goshorn, F. C. Toy and M. D. Stepath, 66–71.
Pilot tests of covered electrodes—H. J. Godfrey and E. H. Mount, 133–136.
Belgian research, 230.
Crippling of compression members—C. E. Inglis, 240.

Temperature, Control and measurement in welding—L. R. Hodell, 41–50.
Distribution—D. Rosenthal and J. Zábrś, 323–331.
Tests, Cold rolling—R. L. Dowdell and T. P. Hughes, 116–118, 364–365.
Weld metal ductility—K. L. Zeyen, 118–120.
Bend ductility surveys—R. D. Williams, 121–122.
Pilot tests of covered electrodes—H. J. Godfrey and E. H. Mount, 133–136.
Spot welds, 333–334.
Titanium welding, 306.
Trepanning—W. T. Tiffin, 37–40.

Utilities, Welding and the, 20.

Ways and Means Committee, 20.
Weldability, Temperature control of welded casing—L. R. Hodell, 41–50.
Welded Mauretania steel—B. P. Haigh, 50.
Cold rolling testing of welds—R. L. Dowdell and T. P. Hughes, 116–118, 364–365.
Bend ductility surveys—R. D. Williams, 121–122.
Symposium, 146–160.
German meeting, 310.
Twenty mild steels—C. E. Jackson and G. G. Luther, 351–364.
Metallurgical changes—R. H. Aborn, 414–426.

Zirconium, Welding, 306.

1940 BOUND VOLUME

Bound Volumes of the JOURNAL of the Society for the year 1940 are now available with imitation black leather covers. Contains a wealth of information on the latest developments in welding. Also contains Subject and Authors' Index. Price, $5.00 plus postage to members; $6.50 to non-members.

SETS OF BOUND VOLUMES OF JOURNAL

In order to provide some of the new members of the Society with an opportunity to complete their library on Current Welding Literature, the AMERICAN WELDING SOCIETY is offering to these new members an opportunity to purchase the last nine bound volumes for the years 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939 and 1940 at $40.00 a set plus postage. The price to non-members for individual volumes is $6.50 and for the set $45.00 plus postage.
Each bound volume contains a Subject and Authors' Index and is bound in attractive imitation black leather covers. The set probably includes the most important welding information available in the literature.

THE WELDING JOURNAL

Published by American Welding Society

33 West 39th Street, New York, N. Y.

Available to Everyone at the Following Subscription Rates:
$5.00 per year — United States and possessions
$7.00 " " — Foreign Countries

Single Copy of Journal	$ .75
Except special numbers:	
October (Annual Meeting Number)	1.00
December (Year Book Number)	1.00
Extra Copies of All Issues to Members	.50
